

⚙️ MACHINES

Multifunction-Machine

full-automatic, hydraulic machine

TPM 800

for bands & labels with sliding table

ECOflex

and 2 sets of feeding devices

low power consumption

DIN ISO9001

PAT. different int. patents apply

- functions: embossing, PVC / flock welding, hot-foil stamping, die-cutting, cutting, transfer-printing, drying
- applications: bands, ribbons, labels, caps, leather, shoes
- used for raw materials & finished goods like: bands, ribbons, labels, caps, shoes
- features: material programs, user programs, program history, required supplies show in display, functions help menu, calculation of piece cost, 7-day timer, lock / unlock function, error messages, gallery, accessories, display of other machines, stroke adjustment, 2 full-automatic feeding devices with step motors, breaks and sensors, full automatic pneumatic cutting device, running meter measuring device, multiple rolls usage

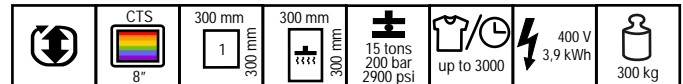

TPM 800 functions:

TPM 800 applications:

TPM 800 technical data:

TPM 800 optional accessories:

- technical data: full-automatic,
- color touch screen 8", high power speed CPU
- stainless steel sliding table: 300 x 300 mm
- workstation: 1
- stainless steel heating plate: 300 x 300 mm
- high pressure hydraulic system: 15 tons / 200 bar / 2900 psi
- production capacity: up to 3000 pieces / hour
- power supply: 400 V / 3,9 kWh
- net weight: 300 kg
- transformer for other voltages (optional)
- optional accessories: cap frames, silicone pads for transfer printing, die-cutting boards
